REMARKS

The figures of births and deaths shown in this statement for week ending the 18th June, 1955 relate to 186 towns with an estimated population of 25,816 thousands. The total number of towns is 300 and their population is 38,988 thousands. Thus 62% of the total number of towns representing 66% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 14,993 and 72,83 representing birth and death rates of 30·0 and 14·7 per thousand of population respectively.

(a) *States (Part A and Part C).*—The data here relate to 157 towns with an estimated population of 21,458 thousands. Information about Ajmer, Assam, Bihar, Madhya Pradesh and West Bengal could not be included. The total number of towns is 252 and their population is 32,572 thousands. Thus 62% of the total number of towns representing 66% of the total population is covered. The

number of births and deaths recorded in these towns were 12,780 and 6,405 representing birth rates and death rates of 31·0 and 15·5 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(b) *States (Part B).*—The data here relate to 29 towns with an estimated population of 4,358 thousands. The total number of towns is 48 and their population is 6,416 thousands. Thus 60% of the total number of towns representing 68% of the total population is covered. The number of births and deaths recorded in these towns were 2,213 and 878 representing birth and death rates of 27·0 and 10·7 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
